**C: Reading Comprehension**

*Read the passage and choose the best choice for each question.*

Education is the process by which people gain knowledge, skills, habits, and values. The word education is also used to describe the results of the educational process. Education should help a person become a useful member of society. It should also help him develop an understanding of his culture and live a better life. The most common way to get an education is to attend school. But much education also takes place outside the classroom.

Education involves both learning and teaching. Sometimes, people learn by teaching themselves. But they also learn with the help of other people such as parents or teachers. Parents are a child's first and perhaps most important teachers. But few parents have either the time or the ability to teach their children everything that they need to know.

A modern society cannot continue its life without education. But most nations consider education's benefits to individuals equally as important as its benefits to society.
