D: Reading Passage

Read the following passage and answer the questions as required.

All the useful energy at the surface of the earth comes from activity of the sun, the sun heats and feeds mankind. Each year it provides men with two hundred million tons of grain and nearly ten million tons of wood .

Coal, oil, natural gas and all other fuels are stored – up energy from the sun . Some was collected by this season's plants as carbon compounds. Some was stored by plants and trees ages ago .

Even water power comes from the sun. Water turned into steam by the sun falls as rain . It runs down the mountains and is changed to electric power.

light transmits only the energy that comes from the sun's outer layers and much of this energy that is directed toward the earth never arrives . About nine – tenths of it absorbed by the atmosphere of the earth . In fact , the earth itself gets only one half – billionth of the sun's entire output of radiant energy

۳۸. The underlined " it " in paragraph ۱ refers to the

- a. earth b. sun c. energy d. activity

۳۹. According to the passage, ten million tons of wood is produced on the earth every year .

- a. almost b. only c. exactly d. over

۴۰. Electricity may be the result of

- a. water power coming out of the mountain .
b. steam that rises up into the sky .
c. rain water running down the mountain .
d. water pressure that presses down the side atmosphere.
